YaraVita[®] THIoTTRAC[™] 300

YaraVita THIoTTRAC 300 15-0-0 + 22.8%S

A fully formulated liquid fertilizer solution containing 300 g/l sulphur for foliar application to prevent and treat sulphur deficiencies in wheat. Guaranteed analysis:

22.8% w/w	300 g/l S (57% w/w = 750 g/l SO ₃)
15.2% w/w	200 g/l N (10.5% w/w as Ammonium N, 4.7% as Ureic N)

Highly concentrated liquid solution

- A true liquid containing 100% soluble sulphur
- Does not require oxidation before it can be absorbed by the plant
- Also contains nitrogen to help maintain the proper N:S ratio

Widest tank mixability

- Suitable for almost any tank mix
- Allows greater flexibility in field recommendations

Excellent plant absorption

- Wholly available to the plant through the leaf
- Rapid uptake by the plant
- Maintains the N:S ratio at critical stages
- Lasting feeding effect

Safe for crops and operators

- Easy to handle liquid formulation
- Easy to measure, pour and mix the product in the spray tank

Product recommendation

- Apply 2 l/ac at stem elongation to grain fill (Zadoks 30-79). For moderate to severe deficiency, repeat as necessary at 10-14 day intervals.

Pack size

- 10 litres and 1000 litres
