# YaraVita<sup>®</sup> MAGTRAC CMZ

The first step to foliar nutrition

A Combination of Key nutrients formulated for foliar application to potatoes.  
Guaranteed Analysis: total

|                |      |         |
|----------------|------|---------|
| Nitrogen (N)   | 3%   | 47 g/l  |
| Magnesium (Mg) | 12%  | 190 g/l |
| Manganese (Mn) | 5%   | 78 g/l  |
| Zinc (Zn)      | 5%   | 78 g/l  |
| Copper (Cu)    | 2.5% | 39 g/l  |

YaraVita Magtrac CMZ is a balanced combination of critical nutrients, key for increasing yield early in the season for potatoes.

Four essential elements in one easy to use jug giving the plant an increased leaf index & total plant mass, providing all of the proven nutrients required to increase the quality & quantity of tubers.

Proactive approach by providing nutrients as early as possible to give the best results/impact to avoid hidden hunger. Addressing known yield limiting factors early.

## Application Rate

2.5 liters per acre; first or second fungicide application

## Product Sizes

10L jug & 500L tote

## Benefits

- Removes the need to identify where and when nutritional requirements occur
- Removes the need for multi-applications of several different products
- Highly tank mixable and crop safe
- Highly formulated with 4 key nutrients in one product that are required for maximizing yield potential of the potato crop.
- One product, one solution
